

It's all about the moment

- Understand what you want to achieve in advance
- Check batteries, memory cards and camera settings (ISO, white balance and file type) in advance
- Just shoot, it will not happen again: timing and circumstances are unforgiving
- Observe, connect with what is happening and anticipate, empathy is the photographer's virtue
- Invest time in your photo, we miss much just because we don't look enough
- There is more of a subject than what you first see: explore viewpoints and techniques
- Stay with your photo: if something is missing, wait for it
- Stay with your photo: check your LCD and correct mistakes on the spot
